Bryan Sánchez Peralta
Mobile App Developer, Project Manager

Profile

I am a passionate mobile app developer with a strong desire to continue learning and improving my skills.
I have experience developing both native and hybrid apps.
I am highly motivated, detail-oriented, and enjoy working collaboratively with teams.

Professional Experiences

Capgemini (Mobile Developer) 2024 - Present
Developing white-label and design token solutions in Flutter.
Made experience with Clean architecture and BLoC state management.

Alfa Group (Mobile Developer) 2023 - 2024
First company experience as mobile developer.
Implemented iOS-style design, integration tests and Firebase Cloud Messaging notifications.
Developed closed-source Swift Packages.
Learned Google Cloud fundamentals.

Additional Experiences

S-Park
I created and developed S-Park, a multi-platform app available on both the App Store and Play Store.
During development, I deepened my knowledge of Dart, Flutter and Firebase.

Education and Training

Apple Developer Academy 2022-2023
I attended the Apple Developer Academy after passing two admission exams, where I developed iOS applications using Swift and learned to communicate with professionals from different areas of app development.
I enriched my portfolio and deepened my knowledge of Git, FileMaker, SwiftUI, UIKit, and other iOS frameworks such as CallKit, HomeKit, WidgetKit, and WeatherKit.
Additionally, I improved my presentation skills by developing and presenting each application to internal and external stakeholders.

Google Project Management Certificate, 2022-2023
I completed Google Certificates' courses to gain experience as a project manager through real-world scenarios, from the planning to the closure of projects.
During the courses I learned the theory and use of Waterfall and Agile methodologies and create effective project documents, charts and presentations.
I also practiced in soft skill such as negotiation, influencing, coaching, strategic thinking, problem solving, communication and more.
For manage project, I used many software tools such as Asana, Google Docs, Google Sheets, Google Presentations.

Cisco Networking Academy 2021-2022
In Cisco I learned how to design, build, and maintain computer networks, as well as how to troubleshoot common network issues. Additionally, I gained a strong understanding of network security and how to implement security measures to protect against cyber threats.
Through hands-on labs and simulations, utilizing tools such as Packet Tracer, I developed practical experience working with Cisco networking equipment and became proficient in using networking protocols and technologies such as TCP/IP, VLANs, and routing protocols.

High School Degree: Computer Science 98/100 (IIS Carlo Levi - Portici) 2017-2022
During my studies in high school, I learned the basics of software/web development, database management, and network systems.
I finished school with a knowledge of programming (C++, Java, CSS, HTML, JavaScript, Arduino, Assembly, MySQL), computer programs (Oracle, XAMPP, DEVC++, NetBeans, MySQL Workbench) and project management (Waterfall).

Skills

- **Technical Skills:**
- iOS Development
- Android Development
- Multi-platform Development (Flutter)
- UI Frameworks (SwiftUI, UIKit, Flutter, Native Android)
- Design Patterns (MVVM, MVC, MVP, Clean)
- Git
- Firebase
- Google Cloud
- FileMaker
- Code Linters
- Project Management (Waterfall and Agile)

- **Soft skills:**
- Teamwork
- Public speaking
- Presentation
- Working under pressure
- Negotiation
- Task estimation
- Coaching
- Problem solving
- Stakeholder management
- Working in international environment
- English and Italian language

Certificates

- Apple Developer Academy
- Google Certificates Project Management
- Cisco Networking Academy
- iOS App Development course from Udemy, Inc.
- Android App Development course from Udemy, Inc.
- Flutter Development course from Udemy, Inc.
- New ECDL
- Huawei ICT Academy
